

LEAGUE Organizer Export to GotSoccer

MYSA has created a system to import your data from League Organizer to the GotSport System. This is an easy 3 step process. Remember that the data is only as good as what you have entered. Please take the time to correct and completely fill out all of the information for each player so that your new system will be complete. Thank you for your support.

Step 1:

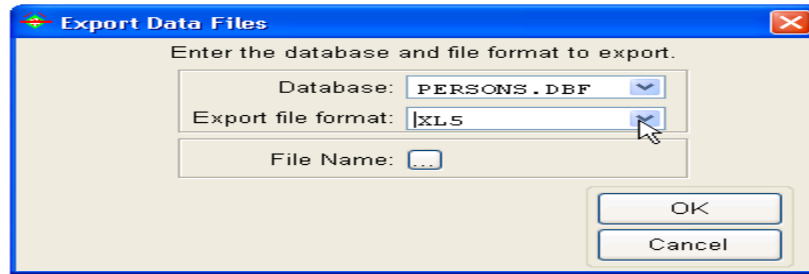

Login on your LO system Select ==> FILES ==> Advanced Features ==> Export Data Files.

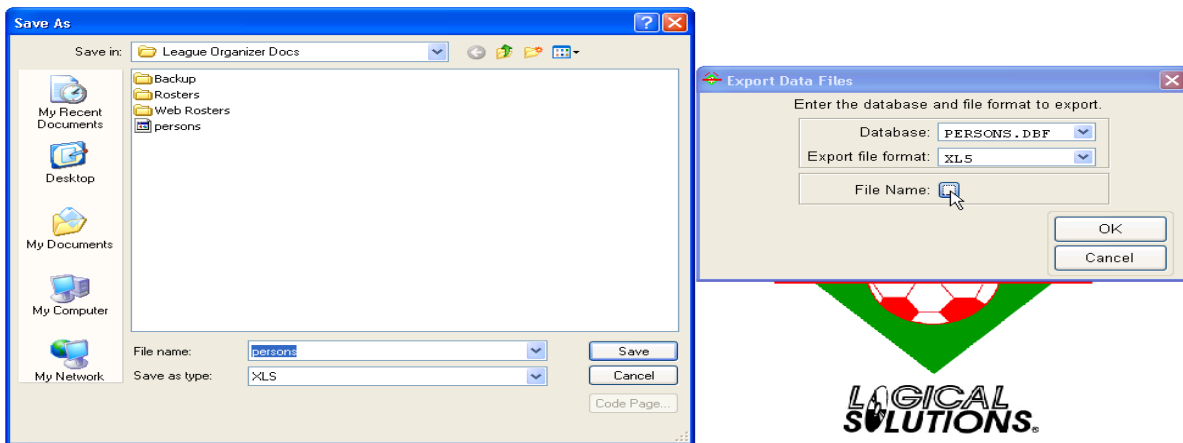

Step 2:

You will be presented with the export data files screen.

Make sure to select the PERSONS.DBF file as the source and XLS (Excel 5) as the destination. Next click on the file name button. You will see a new screen.

Please save this as persons.xls. You will find the file in the League Organizer Docs directory under My Documents unless you have changed the defaults.

Step 3:

Email this file to Karen at MOMSOCC@aol.com. You are now done. Within 2 days your player data will be imported into you GotSoccer Account.
